

CHANGES IN TAJIMA DGML BY PULSE 14.1.8.5395

The following is a list of the new features and improvements included in Tajima DGML by Pulse 14 software since the previous official release.

HARDWARE REQUIREMENTS

Tajima DGML by Pulse version 14 supports Windows 7, Windows 8, Windows 8.1 and Windows 10.

CORRECTIONS AND IMPROVEMENTS

- A correction has been where the spiro fill stitch type pattern was not generating properly.
- An issue has been resolved where perpendicular and center underlay were not generating properly in a satin path segment.
- Some translation issues in German, Japanese and Spanish have been corrected.
- A problem has been corrected when setting two Set Design Start/End points where zooming in modified the start/stop end points.
- An issue was fixed where fractal fill stitches were generating outside of the outline shape.
- An issue was corrected where the option to add an E-Stitch border to an appliqué segment was greyed out.
- A correction has been made where old style fonts did not support 1 or 2 letter monograms.
- An issue was corrected where DGML would lock up generating stitches in certain cases with Victoria font.
- An issue was resolved where an E-Stitch border was not generating properly.
- Some shrink to fit compressions issues have been corrected.
- An issue opening EMB files has been corrected.
- We have added the option to change the stitch length of a pattern fill stitch segment.
- An issue importing PSD files has been corrected.
